

PIPE LAY SYSTEM SUPERINTENDENT

USA – Texas – Houston, Full-time

Nationality: United States Citizen or Resident

Employee Status: Contract

Travel: Yes

THE COMPANY

On behalf of notable Offshore client, OSM Maritime is actively seeking Offshore Personnel specifically for Pipe-Lay Vessels.

Submission Guideline: Subject line of email must reference the position you are applying for.

JOB DESCRIPTION:

Tasks and Responsibilities of the Lay System Superintendent include (but are not limited to):

- Supervising shift Equipment Technicians in support of project operations, including the operation, repair, and maintenance of the lay system (including reels/carousels, tension machines, winches, product handling cranes, CCTV systems, and Communications systems)
 - Assist the Offshore Construction Manager in ensuring that the offshore operations are carried out in an organized and controlled manner, conforming to the company QHS&E requirements
 - Ensuring Equipment Technicians are tasked accordingly, taking due account of their skills and competence.
- Carry out toolbox talks at the start of each shift and for non standard operations.
 - Reviewing the manner in which equipment is being operated and reporting any activities which may subject the equipment to damage or create unsafe conditions.
 - Ensuring relevant equipment-related matters are brought to the attention of the onshore Vessel Technical Manager, including Company technical documentation requiring to be updated, i.e. Operation and Maintenance Manuals, Drawings, Circuit Diagrams, etc.
 - Ensuring relevant equipment records are maintained and electronic copies are kept onboard and passed on to the technician team.
 - Monitoring the usage of relevant spares and consumables required to facilitate repair and maintenance activities. Advising Vessel Technical Manager of spares required, in order to maintain stock level.
 - Immediately reporting any equipment failure to the OCM, making aware that suspension of operations may be required.
 - Advising the OCM of the anticipated duration of repairs required and the operational constraints on continuing activities with faulty equipment.
 - Maintaining the Equipment Shift Log to enable an adequate handover to the oncoming Lay System Superintendent
 - Assisting in commissioning, testing and monitoring of appropriate equipment as required
 - Ensuring that Equipment Technicians wear the appropriate PPE and safety equipment in performance of their duties
 - Ensure that Company Health, Safety, Drugs and Alcohol policies are adhered to at all times.

- Supervise shift Equipment Technicians in support of project operations, including the operation, repair, and maintenance of relevant onboard project equipment.
- Ensure applicable Company and Third Party equipment is operated and maintained in accordance with Company procedures.
- Ensure project equipment operations are performed as directed by the OCM and Vessel Technical Manager.
- Ensure equipment reporting is performed accurately, expediently and efficiently in accordance with Company procedures.

REQUIRED EXPERIENCE AND QUALIFICATIONS:

- Minimum 15 years' experience working in the offshore construction industry
- Extended knowledge in Marine and Subsea operations with experience operating flexible or rigid product lay systems
- High school graduate
- Ability to lead teams with strong leadership and communication skills
- In possession of relevant trade certificate (Electrical/Mechanical/Subsea)
- Valid Offshore Medical
- BOSIET Training or Equivalent (OPITO standard)
- Fluent both in spoken and written English
- Knowledge of DP Vessel Operations
